An ISO 9001:2008 COMPANY

Project Description

Vaikunta Mahaprasthanam, the eco-friendly crematorium site is ready for public service. It is one of the sophisticated and world-class crematoriums in the twin cities for the citizens to experience a hassle-free process while conducting last rite rituals. The GHMC Crematorium is now being maintained by Phoenix Foundation under 'Fund Your City' program launched by GHMC. In a collective effort with GHMC, Phoenix Foundation has rechristened it as Vaikunta Mahaprasthanaman is keeping it in a clean and efficient condition for the smooth conduct of cremations of the departed souls.

PRECA worked in conjunction with Phoenix Foundation contributed its efforts towards the facility as a part of CSR Activity. The opportunity to work with DA Studio – one the most unique architects of the city gave scope to the manufacturing of engraved precast panels.

The precast panels making up the walls of the various sheds of the crematorium were engraved with the words of the Bhagavad-Gita which was achieved using laser etched polymeric substance as moulds. It was one our most creative endeavors which gave us the opportunity to explore our potential as well as the satisfaction of contributing to community.

Over a period of 1 month various Precast Prestressed Hollow core slabs & Precast Walls were used to finish the sheds and toilets at the crematorium.
